ABOUT US

Striving to create an outstanding grill originates from a simple yet very important idea that became the core value of our company: **we want our products to have a positive environmental impact.**

By designing and manufacturing products from quality materials and with the utmost care, we make sure that they will last a lifetime and you will never need to buy another grill again.

Perhaps, you'll even pass it on to generations to follow.

With over 15 years of experience in engineering and manufacturing superpremium products, we set out to create some of the best outdoor grills the world has ever seen. **Our current collection reflects this ambition in every little detail: the best materials, the most high-end manufacturing techniques, outstanding functionality, and a refined contemporary design characterize all our grills.** Vilicci design fits the exterior of a contemporary home perfectly yet it's also timeless; our products will never seem out of place or obsolete.

In addition to this, we carefully design each step of making our products; **we select only the most environmentally sound technologies and minimize waste of raw materials during its creation.**

Whenever we can, we utilize handcrafting which also ensures that product quality is closely controlled throughout the manufacturing process. Each product is hand-finished by one of our highly trained colleagues, and every single piece that comes off our production line is individually quality controlled.

With this much care for our products, we are proud to provide a 10 Year Limited Worldwide Warranty.

VIRTUOSO

Packaged as a piece of art for your patio, the Virtuoso Grill is a true mechanical marvel for backyard heroes with superb functionality and outstanding quality.

Our flagship model features a detachable skewer rotisserie, an adjustable fire pit and several comfort features that help you create some of the most mouth-watering grilled creations you have ever tasted.

ABOUT THE PRODUCT

DESIGN

Our flagship model is a masterpiece of outdoor cooking without a doubt. The striking contemporary design of this versatile cooking unit will definitely draw some attention even when not in use. But of course, the true greatness of this modern grill comes into play when you fire it up.

The special hexagonal cone shape of the fire chamber and the strategically placed air vents ensure a perfect air circulation around the fire which will burn evenly and efficiently throughout the grilling.

INSPIRATION

Our most complex grill both in terms of features and appearance. With the addition of the state of the art skewer rotisserie system this grill ticks all the boxes when it comes to functionality and striking appearance. A true conversation piece for the modern patio.

The tripod's legs can be individually adjusted up to an inch (2.5 cm) to provide excellent stability on uneven surfaces.

The overall weight and low center of gravity ensures that your grill remains completely stable under all circumstances.

All Virtuoso grills come with stainless-steel salt and pepper shakers, oil dispenser and a poker.

TECHNOLOGY

The rotisserie unit can be safely placed on or removed from the grill by opening a sturdy deadbolt latch. This makes it easy to load the rotisserie with up to 5 lbs of meat. You can of course, rotate the skewer rotisserie, or lock it in place and adjust its angle up to 90 degrees when needed. Skewers can also be individually removed from the rotisserie.

The ½' inch thick cooktop will never deform from heat and is slightly slanted towards the inside, so grease will never drip on the ground, and all remaining residue can be easily scraped off into the fire. Emptying ash from the fire chamber is very easy due to the convenient vacuum cleaner port.

By adjusting the height of the inner fire chamber, you can fine-tune the temperature of the grill's cooktop. The cooktop's temperature also slightly varies between the inner and outer parts, so you can control the speed of cooking by placing food at the appropriate area. The double wall construction of the grill ensures that the outer walls are much cooler than the walls of the fire chamber. This makes out grills safer and easier to stand near.

MATERIAL

Self-healing properties of stainless steel ensure that our grills will likely outlast anything else you own. Easy to clean and hygienic surfaces will make your grilling experience sweat-free and safe.

The generously sized cooktop - which measures nearly 40 inches in diameter - and all other precision engineered parts are made from stainless steel or brass which provides outstanding grilling performance and unsurpassed durability. Vilicci grills are completely weather proof, so you will never have to worry about exposing them to the elements.

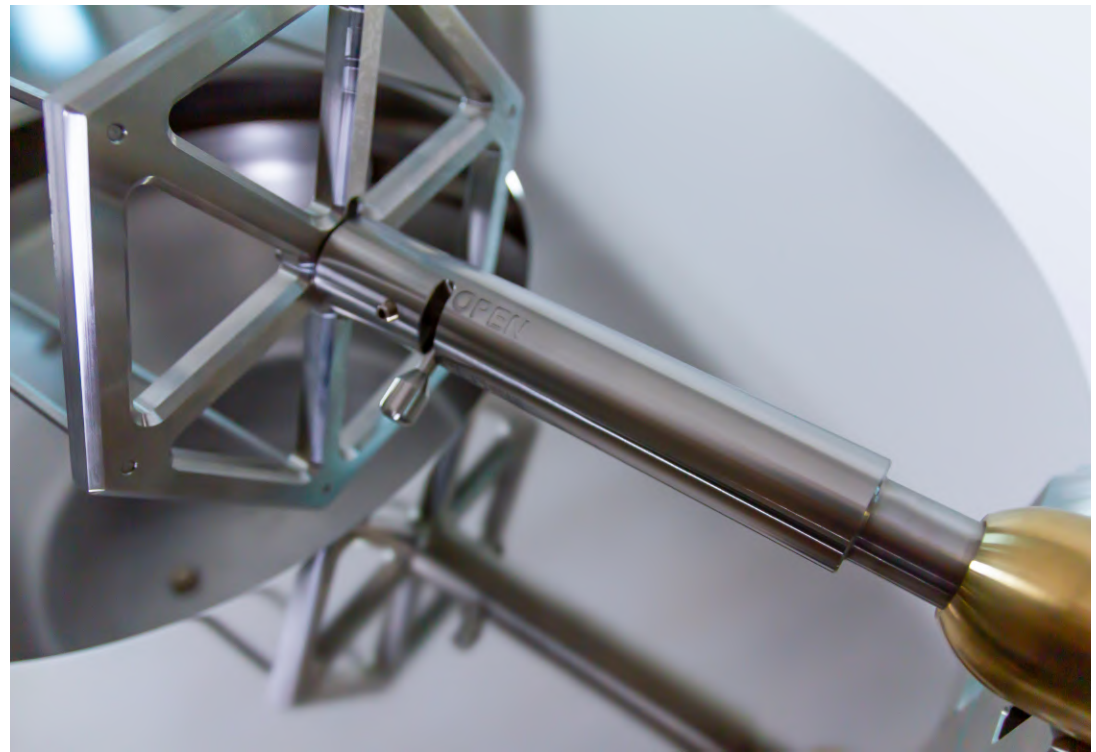

WARRANTY

We are proud to offer a 10 year limited worldwide warranty for all of products. Our products are warranted to be free of defects in material and workmanship for as long as the original consumer owns the product. A defective product will be repaired, replaced, or substituted with a product of equal value. This warranty does not cover damaged product due to misuse or abuse, normal wear and tear, accidental damage or industrial/commercial use.

HOW IT'S MADE: <https://www.youtube.com/watch?v=BSKfkYUnvJQ>

DETAILS, PRICE

Material: Stainless steel (with some brass parts)

Gross weight with accessories: 420 lbs

Cook top diameter: 39 inches (994 mm)

Cook top height: 39.8 inches* (1011 mm)

Grill plate diameter: 17.1 inches (435 mm)

Cook top thickness: 0.55 inches (14 mm)

Leg adjustability: 0.82 inches which raises the grill by 0.67 inches (21 mm/17mm)

Fire Chamber adjustability: 6.7 inches vertically (170 mm)

Free shipping in the EU otherwise contact our customer service.

PRICE: €24,900.00

ESPERTO

Our smallest grill features all the same high-quality parts and adjustable fire pit as its bigger brothers in a more compact form, so you can take advantage of open fire cooking even if you have limited space on your patio or rooftop.

ABOUT THE PRODUCT

DESIGN

Functionality, space-saving design and high-end materials. What else is there to ask for? We matched compact design with the largest possible grilling area that provides the same outstanding cooking experience as our larger grills.

INSPIRATION

We wanted to make sure that the smallest of the bunch also lives up to the highest expectations. Its minimalist design is as mesmerizing as the fire that brings it to life.

By adjusting the height of the inner fire chamber, you can fine-tune the temperature of the grill's cooktop. The cooktop's temperature also slightly varies between the inner and outer parts, so you can control the speed of cooking by placing food at the appropriate area.

The double wall construction of the grill ensures that the outer walls are much cooler than the walls of the fire chamber. This makes out grills safer and easier to stand near.

TECHNOLOGY

Built from precision milled stainless steel and brass parts down to the last bolt guarantees outstanding grilling performance and extreme durability. Self-healing properties of stainless steel ensure that our grills will likely outlast anything else you own. Easy clean and hygienic surfaces will make your grilling experience sweat-free and safe.

The legs of the tripod base can be individually adjusted up to an inch (2,5 cm) to provide excellent stability on uneven surfaces. The overall weight and low center of gravity ensures that your grill remains completely steady under all circumstances. Each Vilicci grill features an easily adjustable fire pit that allows you to comfortably match the intensity of heat to any food you are making.

MATERIAL

Self-healing properties of stainless steel ensure that our grills will likely outlast anything else you own. Easy to clean and hygienic surfaces will make your grilling experience sweat-free and safe.

The generously sized cooktop - which measures nearly 30 inches in diameter – and all other precision engineered parts are made from stainless steel or brass which provides outstanding grilling performance and unsurpassed durability. Vilicci grills are completely weather proof, so you will never have to worry about exposing them to the elements.

MAESTRO

A dream come true for those who expect uncompromised quality, durability and ease of use from their grill. We fused timeless design with precision engineering to meet the highest expectations of both gastro enthusiasts and professional cooks alike.

ABOUT THE PRODUCT

DESIGN

Designed mainly for urban patios and balconies, the Vilicci Maestro electric grill is a fresh take on our original idea to bring uncompromised grilling experience to those who value outstanding product quality and sweat-free cooking. These compact and easy-to-use electric grills provide the best grilling experience without the hassle of open fire grills.

INSPIRATION

Minimalism, usability and comfort. Maestro grills fit perfectly into most interiors or exteriors of any home. Due to its more compact design our smokeless electric grills are perfect for grilling even on smaller urban balconies where open fire grills are simply not option. Efficiency, safety and environmental consciousness all played a key role when designing our flameless electric grills.

TECHNOLOGY

Placed under the stainless-steel cook top, a 3 mm thick copper heating plate was integrated in order to achieve an exceptionally even heat distribution on the cook top. The grilling surface can be heated to a maximum of 535 F (280 Celsius) making Maestro the perfect grill for virtually any food. Due to its built-in precision temperature adjuster the heat on the cooking plate can be set precisely.

The outer ring around the cook top can be used to hang grilling tools with the help of four stainless-steel hooks. Additionally, there is a drip groove around the cooking top which collects any excess grease in two included containers – so all you have to do after you are done grilling is to wipe off the cook top surface.

MATERIAL

The structure of the grill is made entirely of industrial-grade stainless steel down to the last bolt. Our grills are completely weather proof, so you will never have to worry about exposing them to the elements. All stainless steel parts are precision engineered and CNC machined. The cook top is hand polished to achieve superb surface finish which is easy to clean and super hygienic.

WARRANTY

We are proud to offer a 10-year limited worldwide warranty for all of products. Our products are warranted to be free of defects in material and workmanship for as long as the original consumer owns the product. A defective product will be repaired, replaced, or substituted with a product of equal value. This warranty does not cover damaged product due to misuse or abuse, normal wear and tear, accidental damage or industrial/commercial use.
